**EMBU UNIVERSITY COLLEGE**  
(A CONSTITUENT COLLEGE OF THE UNIVERSITY OF NAIROBI)

FIRST SEMESTER EXAMINATIONS 2013/2014

FIRST YEAR EXAMINATION FOR THE DEGREE OF BACHELOR OF SCIENCE

SPH 102: ELECTRICITY AND MAGNETISM 1

DATE: DECEMBER 4, 2013

TIME: 2.00 – 4.00PM

INSTRUCTIONS:

Answer Question ONE and ANY Other TWO Questions.

**Constants**

Electronic charge, $e$	=	$1.602 \times 10^{-19} \text{ C}$
Velocity of light, $c$	=	$3.0 \times 10^8 \text{ m/s}$
1 eV	=	$1.602 \times 10^{-19} \text{ J}$
Mass of electron, $m_e$	=	$9.11 \times 10^{-31} \text{ kg}$
Mass of proton, $m_p$	=	$1.67 \times 10^{-27} \text{ kg}$
Permittivity, $\epsilon_0$	=	$8.85 \times 10^{-12} \text{ C}^2/\text{Nm}^2$
Acceleration due to gravity, $g$	=	$10 \text{ m/s}^2$
Density of water	=	$1 \text{ g/cm}^3$

QUESTION ONE:

a) i) Give a summary of coulombs law.

(3mks)

- i) Consider a system containing many charges  $q_1, q_2, q_3, \dots, q_n$ . Demonstrate how to obtain the force  $F_j$  on charge  $q_j$  due to a number of other charges  $q_i$ . (3mks)
- ii) Two similar balls of mass  $m$  are hung from silk threads of length,  $l$  and carry similar charges. Prove that the separation (4mks)

$$x = \left( \frac{q^2 l}{2\pi\epsilon_0 mg} \right)^{1/3}$$

- iii) A copper wire has  $8 \times 10^{28}$  atoms per cubic meter and cross-sectional area  $5 \text{ mm}^2$ . If a current of  $5 \text{ A}$  flows through the wire, find the drift velocity of the electrons. (3mks)

- b) i) Differentiate between relative permeability from absolute permeability. (1mk)

- i) Consider a solenoid which is carrying an electric current of  $5 \text{ A}$ . Show that the magnetic induction for it is given by:- (3mks)

$$\vec{B} = \frac{5\mu_0}{2\pi r}$$

c)

- i) A  $100 \text{ v}$  d.c supply is used to charge two capacitors in parallel. One of the capacitors is  $4\mu\text{F}$  and the other  $5.0\mu\text{F}$ . Determine the energy stored in the capacitors. (3mks)

- ii) Calculate the flux density and field intensity at a distance of  $10 \text{ cm}$  in air from a north pole with strength of  $10,000 \text{ ampere-meters}$ . (2mks)

Also find the force on another north pole of equal strength at this distance. Assume that the poles are at a large distance. (2mks)

- d) An ammeter of resistance  $0.30\Omega$  can measure currents up to  $1.0 \text{ A}$ . Find the shunt resistance to enable the ammeter to measure currents up to  $5.0 \text{ A}$ . (3mks)

- i) Consider a rectangle  $ABCD$ . At corners  $B$  and  $D$  of the rectangle are placed charges  $+10 \times 10^{-12} \text{ C}$ ,  $-20 \times 10^{-12} \text{ C}$  and  $+10 \times 10^{-12} \text{ C}$  respectively. Calculate the potential at the fourth corner  $A$ . Take side  $AB = 4 \text{ cm}$  and  $BC = 3 \text{ cm}$ . (4mks)

- e) A copper rod  $AB$  is moving with a velocity of  $5\text{ m/s}$  parallel to a straight wire carrying a current of  $10\text{ A}$ . Calculate the induced  $\text{emf}$  in the rod if its lower end  $A$  is  $18\text{ cm}$  away from the wire and its upper end  $B$  is  $2\text{ cm}$  away from wire as shown (4mks)

- f) In an oscillatory circuit  $L = 0.4\text{ Henry}$  and  $C = 0.0024\text{ }\mu\text{F}$ . Find the maximum value of reactance for the circuit to be oscillated. (3mks)
- g) The resistance of a platinum wire at  $0^\circ\text{C}$  is  $4\text{ }\Omega$ . Find the resistance of the wire at  $100^\circ\text{C}$ . (Temperature coefficient of platinum is  $0.0038^\circ\text{C}$ ). (2mks)

## QUESTION TWO

- a) A potential difference of  $20\text{ KV}$  is applied to a parallel plate capacitor with a plate area of  $0.01\text{ m}^2$ . The plates are separated by a dielectric  $2\text{ mm}$  thick. The capacitance of the capacitor is  $2 \times 10^{-4}\text{ }\mu\text{F}$ . Find
- Total electric flux. (2mks)
  - Potential gradient. (2mks)
  - Relative permittivity of the medium. (3mks)
  - Energy stored. (3mks)
- b) A standard cell of  $\text{emf } E_1$ , a potentiometer of resistance  $R$ , a storage battery of unknown  $\text{emf } E_2$  and a galvanometer are connected as shown:

Determine the e.m.f of the storage battery if the current ceases to flow through galvanometer when resistance in the section of potentiometer  $AB = 9$  ohms, in this case take  $E_1$  is 2V and  $R$  is 10 ohms. (5mks)

### QUESTION THREE

- Two point charges of  $12 \times 10^{-10} \text{ C}$  and  $8 \times 10^{-10} \text{ C}$  are  $10 \text{ cm}$  apart. Find the work done in bringing the charges  $4 \text{ cm}$  closer. (6mks)
- Two wires each  $1 \text{ m}$  carrying a current of  $500 \text{ amperes}$  in the same direction are placed with their axis  $0.20 \text{ m}$  apart. Calculate the force between them per meter length. (3mks)
- A solenoid of  $1200$  turns is wound uniformly in a single layer on a glass tube  $2 \text{ m}$  long and  $0.2 \text{ m}$  in diameter. Find the strength of the magnetic field at the center of the solenoid. (3mks)
- A milli-voltmeter can read up to a maximum of  $800 \text{ mV}$  and has a resistance of  $40 \Omega$ . How can it be converted into a milli-ammeter reading up to  $100 \text{ mA}$ ? (3mks)

#### QUESTION FOUR

- a) Three charges of  $\frac{2}{3} \times 10^{-9} \text{ C}$ ,  $\frac{8}{3} \times 10^{-9} \text{ C}$  and  $\frac{10}{3} \times 10^{-9} \text{ C}$  are placed at three corners of an equilateral triangle of sides  $20 \text{ cm}$ . Find the resultant force on the charge of  $\frac{10}{3} \times 10^{-9} \text{ C}$ .  
(6mks)
- b) Sketch construction of a moving coil galvanometer and explain its principle of operation.  
(9mks)

#### QUESTION FIVE

- a) Consider a positive test charge  $q$  that is fired with a velocity  $\vec{v}$  through a point  $p$ . Suppose the charge experiences a sideways deflection force  $F$ . Using a three dimensional reference frame, define the magnetic induction vector.  
(8mks)
- b) Show that the potential at a point  $A$  due to a point charge  $+q$ , at a distance  $x$  is given by

$$V = \frac{q}{4\pi\epsilon_0\epsilon_r r} \text{ volts}$$

(Assume that the charge is placed in air where  $\epsilon_r = 1$ )

(7mks)

---END---
